

Newsletter #2 – March 2026

From Pilots to Policy: Carbon Farming MED Moves Toward Impact

Dear reader,

Welcome to the second edition of the **Carbon Farming MED** newsletter. The project has moved beyond exploration and piloting into a more structured and policy-relevant phase, supported by a newly developed digital platform.

*As we approach the final phase, the focus is on **transferability, scalability, and impact**, with an emphasis on sharing Mediterranean-wide knowledge and solutions through dedicated events.*

Under the Spotlight Carbon Farming MED Conference

28 – 29 May 2026

Administrative District of the Generalitat of Catalonia,
Barcelona

Our Conference will bring together policymakers, farmers, researchers, and carbon market actors to present the project's key results and demonstrate how carbon farming can be operationalised within regional and European policy frameworks.

[Be part of the dialogue in Barcelona →](#)

What to expect

- Key project results and insights from pilot regions
- Policy perspectives on carbon farming in Europe
- Presentation of the new digital carbon farming platform
- Networking with Mediterranean stakeholders

What We Have Been Up To

The project has entered a pivotal stage, moving from testing practices to consolidating results and refining tools for policy use. The focus is now on linking field evidence, digital systems, and research into practical solutions that deliver value beyond the project.

Building the Digital Backbone of Mediterranean Carbon Farming

The Carbon Farming MED digital platform, developed by BETA/UVIC-UCC, is undergoing real-world testing by Azolla Projects, translating field data into credible MRV-based carbon accounting. In parallel, Azolla is developing a digital marketplace for carbon credits, helping connect regenerative practices with emerging Mediterranean carbon markets.

Project Presence & Key Moments

Project partners actively engaged in workshops, events, and policy discussions across the Euro-Mediterranean region.

Partners Meeting in Crete

Partners met in Crete in December 2025 to review progress, strengthen collaboration and align next steps for scaling carbon farming across the Mediterranean.

 Please share this newsletter with colleagues, researchers, farmers, policymakers, and anyone interested in sustainable agriculture and climate action.

 Thank you for being part of our journey. Together, we're cultivating a greener, more resilient future for Mediterranean agriculture. Stay tuned for our next updates!

***Kind regards,
The Carbon Farming MED Team***
